

# LOADMASTER® RIGID RACK

As requirements evolve, rapid deployment and reliability remain critical for military support equipment. ECS developed the Loadmaster® Rigid Rack to complement its industry-leading Rackmount cases. Designed for ruggedized equipment, the Rigid Rack eliminates the shock-isolated rack, using four mounted verticals to secure equipment while reducing space and weight. Like all Loadmaster® cases,

Rigid Racks provide superior protection and modular stack ability. Available in heights from 5U–11U and depths of 20", 24", and 30", these cases ensure dependable performance in demanding environments. Built to match the reliability of the operators who use them, Loadmaster® Rigid Racks deliver durability without compromise.

## FEATURES:

- » 5U to 11U Rack Heights
- » Fits 20", 24", & 30" Deep Ruggedized Equipment
- » Interlocking, Modular Stacking
- » Four Color Options
- » Available Caster Options
- » 3" & 5" Lid Depth Options
- » Watertight

## APPLICATIONS:

- » Ruggedized Servers
- » Ruggedized Modems
- » Ruggedized Routers
- » Ruggedized communications
- » Ruggedized UPS

## TESTING:

Testing including but not limited to requirements listed below in accordance with: MIL-STD-810H, MIL-STD-1472(H)\*, ATAA300(19)\*

- » Drop Testing
- » Loose Cargo Bounce
- » Water Submersion
- » Fungus Growth
- » Low Pressure
